

Community Impact 2026

Investing in healthier tomorrows

HCA Florida Healthcare is building a healthier Florida by expanding access to care, contributing to our communities and supporting the people who care for patients across our state. As the largest provider in the state, we make healthcare more available whenever and wherever it's needed.

As part of HCA Healthcare, we collaborate with care teams across our connected national network to elevate quality, enhance outcomes and share best practices. That means more resources, more solutions and more possibilities for people in Florida.

Above all else, we are committed to the care and improvement of human life.

Our statewide network

Our robust network of specialty services — including advanced treatment for complex blood cancers, endocrine disorders and cardiovascular conditions — helps more people connect to the right care close to home.

- 672 affiliated sites of care statewide
- 13,384 beds
- 50 hospitals
- 27 ambulatory surgery centers
- 76 freestanding emergency rooms
- 129 urgent care clinics
- 372 physician practices
- 11 mental health sites of care
- 14 home health and hospice agencies
- 11 trauma programs, including the nation's top-ranked program
- 2 burn programs
- 9 HCA Healthcare Research Institute sites

Investing in our colleagues

We provide resources to support our colleagues' professional growth, emotional and financial well-being and long-term career development to enhance care delivery across Florida.

- 80,100+ colleagues
- 11,230 doctors
- 32,200+ registered nurses
- 2,580 Graduate Medical Education residents and fellows
- \$412,000 in scholarships awarded to colleagues' family members
- 5,234 veterans hired into healthcare careers since 2022

Showing up for our communities

Through meaningful community partnerships, we're helping address urgent needs, support families and improve health inside and outside our hospital walls.

- 2,000+ nonprofits and organizations supported through donations and volunteering
- 11,700+ colleague volunteers
- 55,697 volunteer hours
- \$1.5 million+ in colleague giving
- \$3.5 million+ in total community contributions

Impacting the Florida economy

We bolster Florida's economy by supporting business growth, local employers and the healthcare infrastructure families rely on.

- \$1.44 billion+ in capital investments
- \$815 million+ in state and local taxes
- \$6.48 billion+ in salaries, wages and benefits
- \$9.52 billion+ in total state investment

Inspiring the future workforce

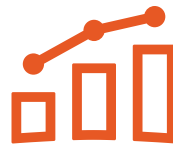

We are helping foster Florida's healthcare workforce by training the next generation of caregivers and creating new opportunities for students to explore career pathways, develop meaningful careers and meet their communities' needs.

- 153 Graduate Medical Education residency and fellowship programs
- 29 teaching hospitals throughout the state
- 6 nursing college campuses across Florida
- 4 of 19 HCA Healthcare Centers for Clinical Advancement located in Florida
- \$1 million gift to the Consortium of Florida Education Foundations for healthcare career development

Advancing care through innovation and access

We're creating healthier tomorrows by making care more accessible, more responsive and more advanced for the patients we serve. We're also expanding what's possible through clinical research, advanced procedures, robotics and innovation hubs designed to improve the patient experience and support better outcomes.

This thoughtful, patient-centered approach helps connect people to specialized care, attracts top clinical talent and enhances quality across our state. For Florida, that means more access to advanced care close to home and a stronger healthcare system for the communities we serve.

2025 by the numbers

12.7 million+
patient encounters

2.9 million+
emergency room visits

657,700+
admissions

34,700
babies delivered

3

hospitals recognized among the top 2% nationally for clinical outcomes

141

liver, kidney and heart transplants performed

54,000

calls triaged through our free 24/7 nurse hotline

We are proud to offer the most comprehensive network of cardiovascular services across the state, from diagnostics and interventional procedures, to treatment for complex heart failure and heart transplants.
