### **HOW TO MEASURE**

**Chest:** Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

**Natural Waist:** Bend side to side and find the natural bend in your body; this is your natural waist. Note: It may not be the smallest point.

**Hip/Seat:** Measure the fullest point between your natural waist and crotch.

**Inseam:** Measure from where the leg meets the body, to the bottom of the ankle bone.

For best results, measure over your undergarments.

### **WOMEN'S CARHARTT FIT GUIDE**

We have updated our sizing charts to more accurately reflect the body standards we build our product to fit, removing ambiguous ranges. The body standards we build product for have not changed, nor has the product. The information update will help to better navigate the Carhartt sizing systems and products. The additional body measurements given will set expectations for all consumers on how the bodies we designed the product for might vary from their own, including those wanting or needing to purchase across gender.
