

How to directly admit your patient to an HCA Healthcare hospital

To request a direct admission for your patient, please call 844.875.5474

Do not send the patient to the facility until a bed has been secured.

Please have the following information regarding your patient:

- Referring and admitting provider name
- Patient name, date of birth and diagnosis
- Level of care and isolation status
- Current location of patient and their home/cellphone number

If the patient is not stable or requires an ICU level of care, the HCA RN coordinator will advise that the patient should proceed to the emergency room.

If the referring physician is not admitting the patient, our team will contact an admitting physician for acceptance.

During office hours, the HCA Healthcare RN coordinator will let you know when the bed is available. After hours, the RN will call the patient at home.

Thank you for choosing HCA Healthcare to care for your patients.
