

TO THE PATIENT: You have the right, as a patient, to be informed about your condition and the recommended surgical, medical, or diagnostic procedure to be used so that you may make the decision whether or not to undergo the procedure after knowing the risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply an effort to make you better informed so you may give or withhold your consent to the procedure.

I (we) voluntarily request Dr. _____ as my physician, and such associates as he/she may deem necessary (for example anesthesia providers, educational assistants, and other health care providers who are identified and their professional role explained to me) to treat my condition. My condition has been explained to me as:

(Condition to be treated)

I (we) understand that the following surgical, medical, and/or diagnostic procedures are planned for me and I (we) voluntarily consent and authorize these procedure(s):

(Procedures)

I (we) understand that my physician may discover other or different conditions which require additional procedures than those planned. I (we) authorize my physician, and any associates, technical assistants and other health care providers to perform such other procedures which are advisable in their professional judgment.

I (we) understand that these qualified medical practitioners may be performing significant tasks related to the surgery such as opening or closing incisions, harvesting or dissecting tissue, altering tissue, implanting devices, tissue removal or photography during procedures.

☐ Initial

I (we) Do ☐ Do Not ☐ consent to the use of blood and blood products as considered necessary. *Benefits, risks, alternatives and the risks and benefits of alternatives have been discussed and I (we) have been given the opportunity to ask questions.*

TEXAS MEDICAL DISCLOSURE

PATIENT IDENTIFICATION

Initial

Just as there may be risks and hazards in continuing my present condition without treatment, there are also risks and hazards related to the performance of the surgical, medical, and/or diagnostic procedures planned for me, such as the potential for infection, blood clots in veins and lungs, hemorrhage, allergic reactions and even death. I (we) also realize that the following specific risks and hazards may occur in connection with this particular procedure(s):

Initial

I (we) Do ☐ Do Not ☐ consent to have one or more manufacturer's technical representatives, as requested by my physician, in the room during the procedure. I understand that one or more representatives from the equipment and/or supply company for the products that the physician will use during my procedure, may be present for the procedure but will not perform any portion of the procedure. I further understand that all manufacturer's technical representatives present have confidentiality agreements and that none of the my personal health information will be disclosed to anyone other than my caregivers within this hospital.

I (we) consent to the disposal by hospital authorities of any tissue or parts which may be removed.

I (we) have been given the opportunity to ask questions about my current condition(s), the proposed procedure(s), the benefits, the likelihood of success, the possible problems related to recovery, the possible risks of nontreatment of my condition, and other alternative forms of treatment, and the risks and benefits of alternatives involved. I (we) understand that no warranty or guarantee has been made to me as to result or cure. Any professional/business relationship between my health care providers, the hospital and educational institutions has been explained to me.

I (we) certify this form has been fully explained to me, that I (we) have read it or have had it read to me (us), that the blank spaces have been filled in, and that I (we) understand its contents. I (we) believe that I (we) have sufficient information to give this informed consent and I (we) request the procedure(s) to be done.

PATIENT IDENTIFICATION

Anesthesia Consent

TO THE PATIENT: You have the right, as a patient, to be informed about your condition and the recommended anesthesia/analgesia to be used so that you may make the decision whether or not to receive the anesthesia/analgesia after knowing the risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply an effort to make you better informed so that you may give or withhold your consent to the anesthesia/analgesia.

I (we) understand that anesthesia involves additional risks and hazards, but I (we) request the use of anesthetics for the relief and protection from pain during the planned and additional procedures. I (we) realize the anesthesia may have to be changed possibly without explanation to me (us).

I (we) understand that serious but rare complications may result from the use of any anesthetic including respiratory problems, drug reactions, paralysis, brain damage or even death.

I (we) voluntarily request that anesthesia and/or perioperative pain management care (analgesia) as indicated below be administered to me (the patient). I understand it will be administered by an anesthesia provider and/or the operating practitioner, and such other health care providers are necessary. Perioperative means the period shortly before, during or shortly after the procedure. I also understand that other complications may occur. Those complications include but are not limited to:

Check planned anesthesia/analgesia method(s) and have the patient/other legally responsible person initial.

- ☐ **General Anesthesia** - injury to vocal cords, teeth, lips, eyes; awareness during the procedure; memory dysfunction/memory loss; permanent organ damage; brain damage.
- ☐ **Regional Block Anesthesia/Analgesia** - nerve damage; persistent pain; bleeding/hematoma; infection; medical necessity to convert to general anesthesia; brain damage.
- ☐ **Spinal Anesthesia/Analgesia** - nerve damage; persistent back pain; headache; infection; bleeding/epidural hematoma; chronic pain; medical necessity to convert to general anesthesia; brain damage.
- ☐ **Epidural Anesthesia/Analgesia** - nerve damage; persistent back pain; headache; infection; bleeding/epidural hematoma; chronic pain; medical necessity to convert to general anesthesia; brain damage.
- ☐ **Monitored Anesthesia Care** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ **Deep Sedation** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ **Moderate Sedation** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ **OTHER** - Including possible complications (required): _____

ADDITIONAL COMMENTS/RISKS:

- ☐ **PRENATAL/EARLY CHILDHOOD ANESTHESIA** - potential long-term negative effects on memory, behavior, and learning with prolonged or repeated exposure to general anesthesia/moderate sedation during pregnancy and in early childhood.

Additional Comments/Risks: _____

I (we) have been given an opportunity to ask questions about my condition, benefits, risks, alternatives and the risks and benefits of alternative forms of anesthesia and treatment, risks and benefits of non-treatment, the procedures to be used, and the risks and hazards involved. I (we) have sufficient information to give this informed consent.

I (we) certify this form has been fully explained to me, that I (we) have read it or have had it read to me, that the blank spaces have been filled in, and that I (we) understand the contents.

I (we) understand that no promises have been made to me as to the result of anesthesia/analgesia methods.

PATIENT IDENTIFICATION

LIST A TEXAS MEDICAL DISCLOSURE

(Rev. 2022)

Procedures requiring full disclosure (List A). The following treatments and procedures require full disclosure by the physician or health care provider to the patient or person authorized to consent for the patient.

Patient to initial appropriate square.

URINARY SYSTEM

☐ (1) **Partial nephrectomy (removal of part of the kidney).**
(A) Incomplete removal of stone(s) or tumor, if present.
(B) Blockage of urine.

(C) Leakage of urine at surgical site.
(D) Injury to or loss of the kidney.
(E) Damage to organs next to kidney.

☐ (2) **Radical nephrectomy (removal of kidney and adrenal gland for cancer).**

(A) Loss of the adrenal gland (gland on top of kidney that makes certain hormones/chemicals the body needs).
(B) Incomplete removal of tumor.
(C) Damage to organs next to kidney.

☐ (3) **Nephrectomy (removal of kidney).**

(A) Incomplete removal of tumor if present.
(B) Damage to organs next to kidney.
(C) Injury to or loss of the kidney.

☐ (4) **Nephrolithotomy and pyelolithotomy (removal of kidney stone(s)).**

(A) Incomplete removal of stone(s).
(B) Blockage of urine.
(C) Leakage of urine at surgical site.
(D) Injury or loss of the kidney.
(E) Damage to organs next to kidney.

☐ (5) **Pyeloureteroplasty (pyeloplasty or reconstruction of the kidney drainage system).**

(A) Blockage of urine.
(B) Leakage of urine at surgical site.
(C) Injury to or loss of the kidney.
(D) Damage to organs next to kidney.

☐ (6) **Exploration of kidney or perinephric mass.**

(A) Incomplete removal of stone(s) or tumor, if present.
(B) Leakage of urine at surgical site.
(C) Injury to or loss of the kidney.
(D) Damage to organs next to kidney.

☐ (7) **Ureteroplasty (reconstruction of ureter (tube between kidney and bladder)).**

(A) Leakage of urine at surgical site.
(B) Incomplete removal of the stone or tumor (when applicable).
(C) Blockage of urine.

(D) Damage to organs next to ureter.
(E) Damage to or loss of the ureter.

☐ (8) **Ureterolithotomy (surgical removal of stone(s) from ureter (tube between kidney and bladder)).**

(A) Leakage of urine at surgical site.
(B) Incomplete removal of stone.
(C) Blockage of urine.
(D) Damage to organs next to ureter.
(E) Damage to or loss of ureter.

☐ (9) **Ureterectomy (partial/complete removal of ureter (tube between kidney and bladder)).**

(A) Leakage of urine at surgical site.
(B) Incomplete removal of stone.
(C) Blockage of urine.
(D) Damage to organs next to ureter.

☐ (10) **Ureterolysis (partial/complete removal of ureter (tube between kidney and bladder from adjacent tissue)).**

(A) Leakage of urine at surgical site.
(B) Blockage of urine.
(C) Damage to organs next to ureter.
(D) Damage to or loss of ureter.

☐ (11) **Ureteral reimplantation (reinserting ureter (tube between kidney and bladder) into the bladder).**

(A) Leakage of urine at surgical site.
(B) Blockage of urine.
(C) Damage to or loss of ureter.
(D) Backward flow of urine from bladder into ureter.
(E) Damage to organs next to ureter.

☐ (12) **Prostatectomy (partial or total removal of prostate).**

(A) Leakage of urine at surgical site.
(B) Blockage of urine.
(C) Incontinence (difficulty with control of urine flow).
(D) Semen passing backward into bladder.
(E) Difficulty with penile erection (possible with partial and probable with total prostatectomy).

☐ (13) **Total cystectomy (removal of bladder).**

(A) Probable loss of penile erection and ejaculation in the male.
(B) Damage to organs next to bladder.
(C) This procedure will require an alternate method of urinary drainage.

☐ (14) **Radical cystectomy.**

(A) Probable loss of penile erection and ejaculation in the male.
(B) Damage to organs next to bladder.
(C) This procedure will require an alternate method of urinary drainage.
(D) Chronic (continuing) swelling of thighs, legs and feet.
(E) Recurrence or spread of cancer if present.

☐ (15) **Partial cystectomy (partial removal of bladder).**

(A) Leakage of urine at surgical site.
(B) Incontinence (difficulty with control of urine flow).

DISCLOSURE AND CONSENT URINARY SYSTEM

* T R E A T *

PATIENT IDENTIFICATION

- (C) Backward flow of urine from bladder into ureter (tube between kidney and bladder).
- (D) Blockage of urine.
- (E) Damage to organs next to bladder.

(16) Urinary diversion (ileal conduit, colon conduit).

- (A) Blood chemistry abnormalities requiring medication. ureter or bowel (intestine).
- (C) Leakage of urine at surgical site.
- (D) This procedure will require an alternate method of urinary drainage.

(17) Ureterosigmoidostomy (placement of kidney drainage tubes into the large bowel (intestine)).

- (A) Blood chemistry abnormalities requiring medication.
- (B) Development of stones, strictures or infection in the kidneys, ureter or bowel (intestine).
- (C) Leakage of urine at surgical site.
- (D) Difficulty in holding urine in the rectum.

(18) Urethroplasty (construction/reconstruction of drainage tube from bladder).

- (A) Leakage of urine at surgical site.
- (B) Stricture formation (narrowing of urethra (tube from bladder to outside)).
- (C) Need for additional surgery.

(19) Percutaneous nephrostomy/stenting/stone removal.

- (A) Pneumothorax or other pleural complications (collapsed lung or filling of the chest cavity on the same side with fluid).
- (B) Septic shock/bacteremia (infection of the blood stream with possible shock/severe lowering of blood pressure) when pyonephrosis (infected urine in the kidney) present.
- (C) Bowel (intestinal) injury.

(20) Dialysis (technique to replace functions of kidney and clean blood of toxins).

- (A) Hemodialysis.
 - (i) Hypotension (low blood pressure).
 - (ii) Hypertension (high blood pressure).
 - (iii) Air embolism (air bubble in blood vessel) resulting in possible death or paralysis.
 - (iv) Cardiac arrhythmias (irregular heart rhythms).
 - (v) Infections of blood stream, access site, or blood borne (for example: Hepatitis B, C, or HIV).
 - (vi) Hemorrhage (severe bleeding as a result of clotting problems or due to disconnection of the bloodline).
 - (vii) Nausea, vomiting, cramps, headaches, and mild confusion during and/or temporarily after dialysis.
 - (viii) Allergic reactions.
 - (ix) Chemical imbalances and metabolic disorders (unintended change in blood minerals).
 - (x) Pyrogenic reactions (fever).
 - (xi) Hemolysis (rupture of red blood cells).
 - (xii) Graft/fistula damage including bleeding, aneurysm, formation (ballooning of vessel), clotting (closure) of graft/fistula.
