

TO THE PATIENT: You have the right, as a patient, to be informed about your condition and the recommended surgical, medical, or diagnostic procedure to be used so that you may make the decision whether or not to undergo the procedure after knowing the risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply an effort to make you better informed so you may give or withhold your consent to the procedure.

I (we) voluntarily request Dr. _____ as my physician, and such associates as he/she may deem necessary (for example anesthesia providers, educational assistants, and other health care providers who are identified and their professional role explained to me) to treat my condition. My condition has been explained to me as:

(Condition to be treated)

I (we) understand that the following surgical, medical, and/or diagnostic procedures are planned for me and I (we) voluntarily consent and authorize these procedure(s):

(Procedures)

I (we) understand that my physician may discover other or different conditions which require additional procedures than those planned. I (we) authorize my physician, and any associates, technical assistants and other health care providers to perform such other procedures which are advisable in their professional judgment.

I (we) understand that these qualified medical practitioners may be performing significant tasks related to the surgery such as opening or closing incisions, harvesting or dissecting tissue, altering tissue, implanting devices, tissue removal or photography during procedures.

☐ Initial

I (we) Do ☐ Do Not ☐ consent to the use of blood and blood products as considered necessary. *Benefits, risks, alternatives and the risks and benefits of alternatives have been discussed and I (we) have been given the opportunity to ask questions.*

TEXAS MEDICAL DISCLOSURE
Hematic and lymphatic system

☐

1. Transfusion of blood and blood components.

1. Fever.
2. Transfusion reaction which may include failure or anemia
3. Heart failure
4. Hepatitis
5. AIDS (Acquired Immune Deficiency Syndrome)
6. Other infections

PATIENT IDENTIFICATION

Initial

Just as there may be risks and hazards in continuing my present condition without treatment, there are also risks and hazards related to the performance of the surgical, medical, and/or diagnostic procedures planned for me, such as the potential for infection, blood clots in veins and lungs, hemorrhage, allergic reactions and even death. I (we) also realize that the following specific risks and hazards may occur in connection with this particular procedure(s):

Initial

I (we) Do ☐ Do Not ☐ consent to have one or more manufacturer's technical representatives, as requested by my physician, in the room during the procedure. I understand that one or more representatives from the equipment and/or supply company for the products that the physician will use during my procedure, may be present for the procedure but will not perform any portion of the procedure. I further understand that all manufacturer's technical representatives present have confidentiality agreements and that none of the my personal health information will be disclosed to anyone other than my caregivers within this hospital.

I (we) consent to the disposal by hospital authorities of any tissue or parts which may be removed.

I (we) have been given the opportunity to ask questions about my current condition(s), the proposed procedure(s), the benefits, the likelihood of success, the possible problems related to recovery, the possible risks of nontreatment of my condition, and other alternative forms of treatment, and the risks and benefits of alternatives involved. I (we) understand that no warranty or guarantee has been made to me as to result or cure. Any professional/business relationship between my health care providers, the hospital and educational institutions has been explained to me.

I (we) certify this form has been fully explained to me, that I (we) have read it or have had it read to me (us), that the blank spaces have been filled in, and that I (we) understand its contents. I (we) believe that I (we) have sufficient information to give this informed consent and I (we) request the procedure(s) to be done.

PATIENT IDENTIFICATION

Anesthesia Consent

TO THE PATIENT: You have the right, as a patient, to be informed about your condition and the recommended anesthesia/analgesia to be used so that you may make the decision whether or not to receive the anesthesia/analgesia after knowing the risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply an effort to make you better informed so that you may give or withhold your consent to the anesthesia/analgesia.

I (we) understand that anesthesia involves additional risks and hazards, but I (we) request the use of anesthetics for the relief and protection from pain during the planned and additional procedures. I (we) realize the anesthesia may have to be changed possibly without explanation to me (us).

I (we) understand that serious but rare complications may result from the use of any anesthetic including respiratory problems, drug reactions, paralysis, brain damage or even death.

I (we) voluntarily request that anesthesia and/or perioperative pain management care (analgesia) as indicated below be administered to me (the patient). I understand it will be administered by an anesthesia provider and/or the operating practitioner, and such other health care providers are necessary. Perioperative means the period shortly before, during or shortly after the procedure. I also understand that other complications may occur. Those complications include but are not limited to:

Check planned anesthesia/analgesia method(s) and have the patient/other legally responsible person initial.

- ☐ _____ **General Anesthesia** - injury to vocal cords, teeth, lips, eyes; awareness during the procedure; memory dysfunction/memory loss; permanent organ damage; brain damage.
- ☐ _____ **Regional Block Anesthesia/Analgesia** - nerve damage; persistent pain; bleeding/hematoma; infection; medical necessity to convert to general anesthesia; brain damage.
- ☐ _____ **Spinal Anesthesia/Analgesia** - nerve damage; persistent back pain; headache; infection; bleeding/epidural hematoma; chronic pain; medical necessity to convert to general anesthesia; brain damage.
- ☐ _____ **Epidural Anesthesia/Analgesia** - nerve damage; persistent back pain; headache; infection; bleeding/epidural hematoma; chronic pain; medical necessity to convert to general anesthesia; brain damage.
- ☐ _____ **Monitored Anesthesia Care** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ _____ **Deep Sedation** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ _____ **Moderate Sedation** - memory dysfunction/memory loss; medical necessity to convert to general anesthesia; permanent organ damage; brain damage.
- ☐ _____ **OTHER** - Including possible complications (required): _____

ADDITIONAL COMMENTS/RISKS:

- ☐ _____ **PRENATAL/EARLY CHILDHOOD ANESTHESIA** - potential long-term negative effects on memory, behavior, and learning with prolonged or repeated exposure to general anesthesia/moderate sedation during pregnancy and in early childhood.

Additional Comments/Risks: _____

I (we) have been given an opportunity to ask questions about my condition, benefits, risks, alternatives and the risks and benefits of alternative forms of anesthesia and treatment, risks and benefits of non-treatment, the procedures to be used, and the risks and hazards involved. I (we) have sufficient information to give this informed consent.

I (we) certify this form has been fully explained to me, that I (we) have read it or have had it read to me, that the blank spaces have been filled in, and that I (we) understand the contents.

I (we) understand that no promises have been made to me as to the result of anesthesia/analgesia methods.

DISCLOSURE AND CONSENT - MEDICAL AND SURGICAL

* T R E A T *

PATIENT IDENTIFICATION

LIST A TEXAS MEDICAL DISCLOSURE

(Rev. 2020)

Procedures requiring full disclosure (List A). The following treatments and procedures require full disclosure by the physician or health care provider to the patient or person authorized to consent for the patient.

Patient to initial appropriate square.

DENTAL SURGERY PROCEDURES

(1) Oral surgery.

- (A) Extraction (removing teeth).
- (i) Dry socket (inflammation in the socket of a tooth).
 - (ii) Permanent or temporary numbness or altered sensation.
 - (iii) Sinus communication (opening from tooth socket into the sinus cavity).
 - (iv) Fracture of alveolus and/or mandible (upper and/or lower jaw).
- (B) Surgical exposure of tooth in order to facilitate orthodontics.
- (i) Injury to tooth or to adjacent teeth and structures.
 - (ii) Failure to get proper attachment to tooth requiring additional procedure.

(2) Endodontics (deals with diseases of the dental pulp).

- (A) Apicoectomy (surgical removal of root tip or end of the tooth, with or without sealing it).
- (i) Shrinkage of the gums and crown margin exposure.
 - (ii) Sinus communication (opening from tooth socket into the sinus cavity).
 - (iii) Displacement of teeth or foreign bodies into nearby tissues, spaces, and cavities.
- (B) Root amputation (surgical removal of portion of one root of a multi-rooted tooth).
- (i) Shrinkage of the gums and crown margin exposure.
 - (ii) Sinus communication (opening from tooth socket into the sinus cavity).
 - (iii) Displacement of teeth or foreign bodies into nearby tissues, spaces, and cavities.
- (C) Root canal therapy (from an occlusal access in order to clean and fill the canal system).
- (i) Instrument separation (tiny files which break within the tooth canal system).
 - (ii) Fenestration (penetration of walls of tooth into adjacent tissue).
 - (iii) Failure to find and/or adequately fill all canals.
 - (iv) Expression of irrigants or filling material past

- the apex of the tooth (chemicals used to clean or materials used to fill a root may go out the end of the root and cause pain or swelling).
- (v) Damage to adjacent tissues from irrigants or clamps.
- (vi) Fracture or loss of tooth.

(3) Periodontal surgery (surgery of the gums).

- (A) Gingivectomy and gingivoplasty (involves the removal of soft tissue).
- (i) Tooth sensitivity to hot, cold, sweet, or acid foods.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (B) Anatomical crown exposure (removal of enlarged gingival tissue and supporting bone to provide an anatomically correct gingival relationship).
- (i) Tooth sensitivity to hot, cold, sweet, or acid foods.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (C) Gingival flap procedure, including root planing (soft tissue flap is laid back or removed to allow debridement (cleaning) of the root surface and the removal of granulation tissue (unhealthy soft tissue)).
- (i) Permanent or temporary numbness or altered sensation.
 - (ii) Tooth sensitivity to hot, cold, sweet, or acid foods.
 - (iii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (D) Apically positioned flap (used to preserve keratinized gingival (attached gum tissue) in conjunction with osseous resection (removal) and second stage implant procedure).
- (i) Permanent or temporary numbness or altered sensation.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (E) Clinical crown lengthening (removal of gum tissue and/or bone from around tooth).
- (i) Permanent or temporary numbness or altered sensation.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (F) Osseous surgery-including flap entry and closure (modification of the bony support of the teeth).
- (i) Permanent or temporary numbness or altered sensation.
 - (ii) Tooth sensitivity to hot, cold, sweet, or acid foods.
 - (iii) Loss of tooth.
 - (iv) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (G) Guided tissue regeneration-resorbable barrier.
- (i) Permanent or temporary numbness or altered sensation.
 - (ii) Accidental aspiration (into the lungs) of foreign matter.
 - (iii) Rejection of donor materials.
- (H) Guided tissue regeneration-nonresorbable barrier (includes membrane removal).

DENTAL

PATIENT IDENTIFICATION

- (i) Permanent or temporary numbness or altered sensation.
- (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (iii) Accidental aspiration (into the lungs) of foreign matter.
- (iv) Rejection of donor materials.
- (I) Pedicle soft tissue graft procedure.
 - (i) Permanent or temporary numbness or altered sensation.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
 - (iii) Rejection of donor materials.
- (J) Free soft tissue graft protection-including donor site surgery.
 - (i) Permanent or temporary numbness or altered sensation.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
 - (iii) Rejection of graft.
- (K) Sub epithelial connective tissue graft procedures.
 - (i) Permanent or temporary numbness or altered sensation.
 - (ii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
 - (iii) Rejection of graft.
- (L) Distal or proximal wedge procedure (taking off gum tissue from the very back of the last tooth or between teeth). Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.
- (M) Soft tissue allograft and connective tissue double pedicle graft from below (creates or augments gum tissue).
 - (i) Permanent or temporary numbness or altered sensation.
 - (ii) Tooth sensitivity to hot, cold, sweet, or acid foods.
 - (iii) Shrinkage of the gums upon healing resulting in teeth appearing longer and greater spaces between some teeth.

- (iii) Sinus communication (opening from tooth socket into the sinus cavity).
- (iv) Failure of implant requiring corrective surgery.
- (v) Cyst formation, bone loss, or gum disease around the implant.

(4) Implant procedures.

- (A) Bone grafting (replacing missing bone).
 - (i) Permanent or temporary numbness or altered sensation.
 - (ii) Rejection of bone particles or graft from donor or recipient sites.
 - (iii) Damage to adjacent teeth or bone.
- (B) Surgical placement of implant body.
 - (i) Blood vessel or nerve injury.
 - (ii) Damage to adjacent teeth or bone fracture.
